

## Image Processing/ Embedded HW Design Engineer

- Forza Silicon is a privately held mixed signal chip design and fabless semiconductor company creating breakthrough designs and products for world-class customers. We are looking for an experienced Image Processing Hardware design engineer to support our growth.
- In this position, you will report to the Group Leader and assume responsibility to perform algorithm development, detailed HW design, simulation, verification and test of digital imaging and embedded processing circuits.
- The position requires a MS in Computer Engineering plus 5+ years experience of electronics design. RTL/logic design using VHDL/Verilog for Xilinx FPGA with FPGA firmware design experience on Microblaze required. Experience with CMOS image sensors and VC++ will be a strong plus.
- We offer a casual, dynamic work environment and an attractive benefits package,
- including: Health, Dental, Life and Long Term Disability insurance; 401K plan; paid
- holidays and vacations.
- Send resume to [careers@forzasilicon.com](mailto:careers@forzasilicon.com)
