

Senior ASIC Design Engineer

- Forza Silicon is a privately held mixed signal chip design and fabless semiconductor company creating breakthrough designs and products for world-class customers. We are looking for an experienced ASIC design engineer to support our growth.
- In this position, you will report to the CTO and assume responsibility for ASIC module designs, design and implement testing, and participate in system architecture and design flow..
- The position requires a BS in Electrical Engineering (MS will be considered a strong plus) plus 5+ years experience of ASIC design. Experience with CMOS image sensors or signal processing will be a strong plus.
- We offer a casual, dynamic work environment and an attractive benefits package, including: Health, Dental, Life and Long Term Disability insurance; 401K plan; paid holidays and vacations.
