

## Senior Hardware Test Engineer

- Forza Silicon is a privately held mixed signal chip design and fabless semiconductor company creating breakthrough designs and products for world-class customers. We are looking for an experienced ASIC design engineer to support our growth.
- In this position, you will report to the CTO and assume responsibility for test design and implementation of all aspects of electronics required to test complex imaging systems including analog and digital PCB design; data acquisition; integration of processing hardware, software and firmware.
- The position requires a BS in Electrical Engineering or related science (MS will be considered a strong plus) plus 5+ years relevant design and test experience. Experience with CMOS image sensors will be a strong plus.
- We offer a casual, dynamic work environment and an attractive benefits package, including: Health, Dental, Life and Long Term Disability insurance; 401K plan; paid holidays and vacations.
